REPORTS & BUDGETS

Data and Logic that Would Make Spock Giggle

Powerful reporting, manageable budgets, one simple platform

AWARDCO REPORTING HELPS YOU

- ✓ **List all your budgets** and owners in one place
- ✓ **Allocate funds** for ongoing, peer-to-peer, or spot recognition programs
- ✓ **Reallocate** unused budget amounts to other recognition programs
- ✓ **Deep dive** into your data with metadata tags
- ✓ **Utilize reports** in a robust reporting dashboard
- ✓ **Download and manipulate** all your data—even the markups! (there aren't any)

Managing finances and budgets for your rewards program can be a challenge. Awardco has created an innovative, simple, and flexible platform that helps you manage your recognition and rewards budgets with ease. You can quickly view allowances and expenditures for all your recognition programs at a glance, or dive deeper into the data by downloading all (and we mean all) the information we collect to crunch the numbers however you like.

All of these capabilities are built into one groundbreaking recognition and rewards platform so you can save time and money, no matter how many recognition budgets you manage. Put the time you would have spent stressing over budgets on what it should have been spent on in the first place: recognizing great work and great people.

“The entire recognition process should be managed with a minimum of administrative effort. A system that requires excessive management control or complex financial calculations...will not likely achieve it's desired results.”

— Society for Human Resource Management

Rewarding yourself with Awardco is logical.
